About me

I am a full stack (frontend leaning) software engineer who works mainly with Angular + TS on the front end, and Python on the back end. I am currently working at Anaconda on a product team, pushing out new features for external, customer use.

Previously I have worked heavily with React and Svelte.

Education

University of Missouri - Columbia, MO - *Bachelor of Science, Electrical and Computer Engineering*

Graduated May 2018

Skills

- Certified ScrumMaster
- Javascript, React, Svelte, Angular, Python, C#, Node, Unity, QML

Experience

Esri (Remote & St. Louis, MO) - *Software Engineer (Consulting)*

June 2018 - December 2022

- Primarily contributing with React and Typescript, or Python to develop custom applications for clients.
- Acting as tech lead on projects with other developers.
- Assisting with interviewing, onboarding, and mentoring new hires.

Anaconda (Remote) - *Software Engineer III*

December 2022 - PRESENT

- Primarily contributing with Angular and Typescript on the frontend of a cloud product.
- Acting as a member of a larger Agile team.
- Contributing with Python and Flask on the backend.
